Register Now for APCO's Envision Training on Cyber & NG9-1-1

During this intensive one-day training, attendees will learn important information on cybersecurity, Next Generation 9-1-1 and the big-picture challenges facing PSAPs with changes in technology.

Why attend as a public safety practitioner: Using a variety of interactive simulations, scenarios and exercises, attendees will learn important concepts helpful for addressing issues related to cybersecurity and NG9-1-1.

"An outstanding look and deeper dive into a complicated problem that provides simple, easy to implement steps and procedures."

- Past envision attendee

This training is worth seven (7) CEUs.

Early bird registration special:

Before December 28, APCO full and associate members can register for **less than \$100.**
